

CARDBOARD SHREDDERS DELOS

The DELOS cardboard and polystyrene shredders have been specifically designed to reduce the volume of large cardboard boxes and bulky packaging. Their motor power ranging from 12kW to 16kW and their special hooks allow them to process flat and shaped cardboard of all sizes and thicknesses.

With 4 shafts and a low rotation speed, the DELOS shredders allow for low-noise and dust-free shredding. The sizing screen guarantees a constant output particle size and can be removed to maximise the output.

They can be coupled directly with a baler or a pneumatic conveying system. Our expertise allows us to adapt to all your needs.

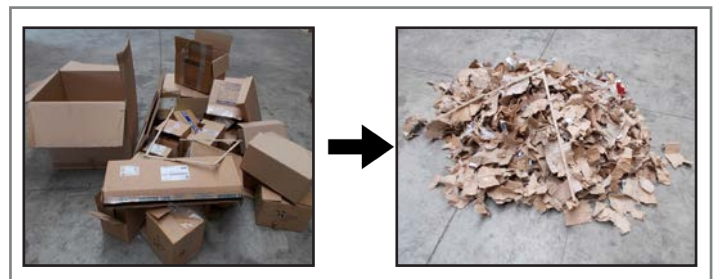

DELOS-1400

DELOS-700

- Possibility of shredding cardboard and polystyrene of all sizes and thicknesses.
- A constant particle size adapted to your needs thanks to the sizing screen.
- Possibility of vertical or horizontal loading.
- Can be directly coupled to balers or pneumatic conveying systems.
- Low noise level (<75dB) and no dust generated.
