BLiK "CLEAN" MINI CRUSHERS, BB Series, 2 Rotors (continued)

BLiK crusher BB160
destruction of tickets
and plastic cards

Clean, because they include an exclusive, patented, rapid blade-cleaning mechanism which doesn't require disassembly.

Easy maintenance: this is particularly important for hygiene and servicing and when you need to crush something that mustn't be contaminated by residue from previously treated material. This takes no longer than fifteen minutes.

Universal: because their mixed blades can be configured to produce varying degrees of crushed material and to perform at different strengths.

Modular: they can be doubled or tripled in thickness. Pieces can be added or removed. This makes them even more flexible.

They come in 3 thicknesses; 8 – 6 and 4 mm. This allows the crusher to be configured in over 150 different combinations.

Automatic: they are equipped with automatic reverse-start-stop mechanisms as standard. This is controlled electronically and. All crushers with rotating blades can be equipped with a special, proprietary, microprocessor.

Options: they can be fitted with a pneumatic or manual slammer.

Adaptable: all hoppers and chassis can be adapted for special purposes or conditions. They are available in special versions, (stainless steel or fireproof, for example).

Safety: all crushers meet "CE" specifications and comply with current safety standards. They are made from top quality components by well known manufacturers and come with a one year guarantee.

BB230 BLiK
crusher: with
pneumatic
rammer: for
plastic bottles.
Handles 500-600
per hour.

BB 160-350 series: standard
hoppers and chassis – with
pneumatic rammer as optional.

BB 230 series
hopper volume
and window

Material	Hourly output*
Metal shavings	100 to 500 Kg
Office bins	1 to 2 m3
Plastic containers between 2 and 10 litres	1 to 2 m3
Plastic PVC and PET containers	800 units or 1 m3 or 40 kg
Telephone equipment	50 - 100 kg
Domestic batteries	700 kg
Metal tops, wire caps	300 kg or 2 m3
Various fabrics and leather	50 - 200 kg
Floppies and CDs	1000 to 1500
33 cl. cans	500 to 1000
Electronic circuits	100 to 150 kg
Pharmaceutical bulbs and syringes	15 to 30.000
Paper filters	50 to 250 kg
Plants and bark - Algae	50 to 200 kg

* Depending on power, density & quality of crush required
