The french manufacturer, BLiK, designs, studies, develops and
manufactures "universal" crushers with rotating blades for a wide
range of industrial purposes.

These uniquely designed crushers come in a variety of
configurations ranging from 2 to 30 kW and benefit from special
design patents which make them easy to run and to service.

They can be used for destroying and reducing huge volumes of
a wide range of industrial waste materials and are also perfect
for getting rid of unwanted documents and hospital waste or for
reprocessing, etc... They are the solution to a long standing and
complex problem.

They are readily available in stainless steel and fireproof versions.
BLiK design studios can also develop versions in alternative
materials to meet specific requirements.

The company has also been in the forefront of supplying a complete
range of metal bailing, barrel presses and document shredders,
over the past 25 years.

Volume reduction

Files

Barrels

Destruction, confidentiality

Customs

Banking

Safety, hygiene

Pharmaceuticals

Nuclear

Reprocessing

Catering

Metals

Files and office materials: destruction, volume reduction:

Shredding printed material and files (entire binders) in a BLiK crusher.

Industry, trade: volume reduction and packaging

Crushing metal containers in a BLiK B600

Crushing plastic containers in a BLiK B600.

Shredding (whole, un-flattened) cardboard boxes in a BLiK crusher and creating new cardboard packaging sheets. Major volume reduction; reprocessing waste materials; Servicing largely aided by endless screw.

Hospitals, clinics, chemists: single use products, pharmaceutical packaging...

Banks, telephone, electronics: destruction of cheques, credit cards, etc.

Shredding and destroying credit cards in a BLiK crusher (credit cards, telephone cards, etc.).

Shredding and destroying cheques.

Customs, justice, police: seized goods to be destroyed.

legal reasons: solution: a "universal" BLiK shredder (here, packets of cigarettes).

Administration, police, justice: destruction of seized goods for

Nuclear: neutralisation of single use equipment

on a specially equipped BLiK shredder.

Nuclear industry: crushing equipment from radioactive areas

Mechanical industry, automobile: reprocessing of waste products

Shredding galvanised tubes in a BLiK shredder (huge reduction in volume, reprocessing).

Crushing "carrots" from a zinc alloy foundry (huge reduction in volume, reprocessing).

Recycling: auto breakers, waste reprocessing

Crushing car bumpers in a BLiK crusher (huge reduction in volume, reprocessing).

Crushing car bumpers in a BLiK crusher (huge reduction in volume, reprocessing).

Agro alimentary: destruction of non compliant products, volume reduction.

Agro alimentary: destroying (whole batches of) products in a BLiK crusher (here, coconuts).

Agro alimentary: crushing waste products in a BLiK crusher (here, scallops).

Hotels, restaurants: volume reduction, pre treatment of waste

Agro alimentary: shredding of plastic moulds (here, yoghurt containers) in a BLiK shredder: total amount divided by 10

Restaurants, hotels, communities: crushing drink cans in a BLiK crusher: volume reduction and reprocessing.

Crushing glass bottles in a BLiK B400 crusher, equipped with glass breaking blades.

Restaurants, hotels, communities: plastic bottles: volume, liquid waste, etc. Solution: shred in a BLiK.

Perfect hygiene, zero corrosion? Solution: STAINLESS STEEL BLiK (optional)

Stainless steel: cutting block and slammer.

Stainless steel: cutting block and blades.

Stainless steel: cutting block without blades.

Stainless steel: blades.

BLiK CRUSHERS Monorotor "M420-530 & M420-700"

SPECIALLY DESIGNED FOR COMMUNITIES and RESTAURANTS

It takes up very little space when installed on a skip

hopper for introducing all kinds of products including bags full

The "heat" of the crusher conforms to BLiK standards and can

motor and gearbox "Oversized"

Reduces waste volume (up to 9/1, depending on product)

Flat, easy to clean

Accepts all types of containers.

Cabinet can be closed to conceal skip

This crusher was designed for eliminating a variety of materials and waste products which normally occur in reprocessing, trade or services.

It is used for general destruction and for reducing the volume of hard, hollow objects such as bottles, plastic barrels, metal containers and cardboard boxes.

If jamming occurs, it automatically goes into reverse for up to 3 times before going into standby or restarting, after getting rid of the jam.

The special, highly resistant, blades can easily be disassembled and fitted onto an exclusive BLiK anti shock system.

Tilting Hopper : introduction bags fast, effortlessly and safely

BLiK MONOROTOR CRUSHER "420-520" SPECIALLY DESIGNED FOR COMMUNITIES and RESTAURANTS

Blades in special steel

Shock absorber system for rejection of unbreakable objects

BLIK "CLEAN" MINI CRUSHERS, BB Series, 2 Rotors

BLiK Mini crushers can be used practically anywhere: office, industry, laboratory, community.

Be it to eliminate documents, packaging or contaminated waste products, they can easily be adapted to most situations. They are ideal for destroying sensitive documents for security purposes or if you just want to make more space.

They are ideal for getting rid of packaging or surplus branded and luxury goods to avoid fraudulent use, which could prejudice the image of the company or manufacturer.

New or used metal or plastic containers, tanks, bottles, etc...

Electronic components and circuit boards for recycling or safety reasons.

Various types of security cards including bank cards and passes. IT media in general and CDs.

Hazardous waste materials: batteries and, pharmaceuticals.

Recycling and processing of food products.

BLiK "CLEAN" MINI CRUSHERS, BB Series, 2 Rotors (continued)

BLiK crusher BB160
destruction of tickets
and plastic cards

Clean, because they include an exclusive, patented, rapid blade-cleaning mechanism which doesn't require disassembly.

Easy maintenance: this is particularly important for hygiene and servicing and when you need to crush something that mustn't be contaminated by residue from previously treated material. This takes no longer than fifteen minutes.

Universal: because their mixed blades can be configured to produce varying degrees of crushed material and to perform at different strengths.

Modular: they can be doubled or tripled in thickness. Pieces can be added or removed. This makes them even more flexible.

They come in 3 thicknesses; 8 – 6 and 4 mm. This allows the crusher to be configured in over 150 different combinations.

Automatic: they are equipped with automatic reverse-start-stop mechanisms as standard. This is controlled electronically and. All crushers with rotating blades can be equipped with a special, proprietary, microprocessor.

Options: they can be fitted with a pneumatic or manual slammer.

Adaptable: all hoppers and chassis can be adapted for special purposes or conditions. They are available in special versions, (stainless steel or fireproof, for example).

Safety: all crushers meet "CE" specifications and comply with current safety standards. They are made from top quality components by well known manufacturers and come with a one year guarantee.

B600 / 500 – 750 – 950 series BLiK crusher-shredders, 2 Rotors

Powerful, Silent, Adaptable, Multi-product

The B600 series crushers are bi-rotor crushers with rotating blades which can handle a wide range of materials.
They are powerful and silent and can easily be adapted to crush materials as wide ranging as wood, metal, rubber, paper, plastic and composites.
They are equipped with a quick cleaning, cutting block; designed and patented by BLiK.
The highly resistant, steel blades are mounted on a hexagonal axle and can be configured in a number of ways, to suit the material and quality of crush required.

Discharge out by belt conveyor

BLiK CRUSHERS B 840 Serie, 2 Rotors

The french manufacturer, BLiK, designs, studies, develops and manufactures "universal" crushers with rotating blades for a wide range of industrial purposes

These uniquely designed crushers come in a variety of configurations ranging from 2 to 30 kW and benefit from special design patents which make them easy to run and to service.

The B840 series crushers are two-shaft crushers with rotating blades which can handle a wide range of materials. Power: 30kw - cutting width: 758 - 1250 mm.

ADVANTAGES:

Slow Rotation, silent, no vibration

Electric Control, planetary gearbox for a crushing without blows

Regular rotation of the shafts thanks to the electronic system of regulation according to the load of the crusher

Automatic greasing for protection of the bearings and elements of transmission against acids, fluids and dust

Commands adaptable to the products to be crushed thanks to the system of electronic inversion integrated

Easy maintenance, rigorous quality control

BLIK CRUSHERS, 4 Rotors, Series Q300, Q500, Q700, with calibration screen, for a more homogeneous and finer result

Crushers «Quadrirotor» allow installation of a calibration grid that stops too large shreds, which are automatically reintroduced in the crusher.

We so obtain a result in compliance with the re-use of the waste in a technological process very demanding but very rewarding.

Size of cutting block: 330 - 770 x 230 - 700 mm.

Power : 4,4 - 22 kW.

Evacuation via screw on the back in a dedicated compartment.

Summary of Blik mobile B400-370

Model	B 400 / 370
Cutting unit	420 x 370 mm
Power (on-board hydraulic version) requires power take-off on supplying lorry engine approx.	20 HP
Hopper volume (**)	100-170 L
Dimensions (mm) with chassis - L x D x H. (**)	1390 x 1560 x 2000
Blade diameter	200-220
Blade thickness	8-12-24 mm
crushing paper: kg/heure flow	300 à 500
Number of spikes	1 à 14
Electronic control	Telemechanic automaton
Weight	approx.500 kg
Made in France – "EC" conformity – guarantee 1 year	
(*) Non-contractual. Subject to technical or visual modifications	
(**) depends on use and installation.	

BLIK Crushers-Shredders: Special installations

In addition to the standard models, we can install specially designed crushers to suit any specific process, as well as systems capable of carrying out several operations, without the need for any intermediate servicing. Below are some of our designs:

BB230
Crushers with
load lock and
rotary feeder

B600-950 For paint pots with
conveyor feeder for
30 m3 skips. m3 skips.

B600-500
For full ATEX paint
pots with container
remover

B600-950
With hydraulic
container remover

B400-370 Paper shredder
with conveyor
feeder and evacuation feeder.

B600 Extraction
conveyor and
cylindrical sieve for separating
the contents and powdered
products

B400 Printed paper
shredder with
conveyor belt evacuation.

BLIK Crushers-Shredders: Special installations

B600-510 + Q500-510
crushing of joints automobile rubber

B400-510 Crusher with raise-container and screw of liquid-solid separation

B400-510 crushing of coffee dosettes + separation aluminum and coffee + rinsing

B400-750 perforator + separation screw liquid-solid

B400-510 grinding of hot bitumen
